DUAP- Quality is based on History

The history of DUAP is a story of continuity on the one hand and flexibility on the other. Since its establishment in 1943 DUAP has manufactured injection nozzles. The first customer was the leading tractor manufacturer in Switzerland.

Since 1963 DUAP have made co-operation agreements with some of the most important engine builders, for example Sulzer brothers, S.E.M.T. Pielstick and Wärtsilä for whom DUAP has developed and produced modern injection systems for their engines.

During this time injection systems for Diesel engines of all power ranges have been delivered throughout the world covering the complete scope of applications, Marine, Traction, Stationary, Automotive, and Aeronautical. Based on its extensive experience DUAP is pushing forward with its own research and development into new areas of material processing.

Chronicle

1943

Founded

1956

Move to present factory

1969

Commencement of high precision manufacture (turned parts from drilling machines)

1983

First pump injector built by DUAP

1985

Continuous extension of own heat treatment plant

1987

Focus on EFI Diesels with manufacture of trial samples and testing equipment

1996

Building of the first Piezo Common Rail injector

1998

Launching of the new high quality DUATOP product range

2000

Market introduction of the DUARAIL common rail system with modular construction, own high pressure pumps (up to 2000 bar), high pressure piping systems and rails, injectors and electronic controls.

2006

Introduction of the RECON for EFI diesels

2007

DUARAIL introduced in China

2008

New production building 2700m²

2009

Renewal of production technologies

2010

Introduction Medical Certification ISO 13485

2011

DUARAIL and DUATRON introduced in USA and Europe

Company Philosophy

It is important for our customers to know what sort of a company we are and how we approach our responsibilities in business.

Man stands at the centre of our philosophy. To identify correctly his wishes and complex problems and to offer solutions for these, is in the interests of both parties. We have to listen! «Give and Take» is an intrinsic part of all partnerships and from this stems the AVSP (added value sharing partnership) Philosophy.
