Fuel Injection Systems and Parts

Corona update

Because of a very good preparation and implementation of the Swiss government protection concept, we managed the uncomfortable situation very well.

Fortunately, we have had no infected employees, all our production machines are up and running and all our department are fully available.

Please contact our sales staff to discuss the necessary orders so that you have the goods and services on hand whenever you need them.

We are optimistic about the future...

Regards,

Dr.H.O.Geisser, VRD
